# Guillaume Creusot

Software Engineer / Tech Lead - AI Integration

Toulouse, France - Relocating permanently to Malaysia  guillaume-creusot-678237179

## Summary

Software Engineer and Tech Lead with 5 years of experience building and operating production software systems. Leads a team of 3 while remaining hands-on across architecture, implementation, and delivery of AI-enabled features such as agentic chat, document extraction, and form-completion assistants. Seeking hands-on Software Engineer or Tech Lead roles in Malaysia focused on AI-enabled software systems.

## Experience

**Avanteam**, Tech Lead - AI Team — Toulouse, France
Oct 2025 – present
1 year 1 month

- **Customer Delivery:** Deployed LLM-powered solutions to 10+ customers by integrating them into their Avanteam apps and managing key accounts end-to-end.
- **AI Platform:** Led development of an AI assistant integrated into Avanteam Solution to help users exploit documentation and quality records, built with Python/FastAPI, LangChain/LangGraph, .NET/React, and Azure Search / OVH PostgreSQL.
- **Data & Infrastructure:** Migrated AI retrieval from Azure Search Service to France/EU-based managed PostgreSQL with pgvector and a managed Kubernetes cluster on OVH, keeping customer data in-house with isolated databases per customer.
- **Operations:** Operated a production monitoring stack with centralized logging and alerting across customer deployments.
- **Collaboration:** Tech Lead for a team of 3, balancing ~70% hands-on engineering with architecture and delivery; partnered with the CTO to drive AI adoption and MCP usage.

**Personal Travel in Southeast Asia**, Career Break — Mar 2024 – Oct 2025
1 year 8 months

- **English:** Improved spoken English through full immersion.
- **Software engineering:** Learned Rust and studied local AI/RAG, sharpening functional-programming fundamentals.
- **Culture:** Traveled across Thailand, Cambodia, Indonesia, and Malaysia, where I met my wife.
- **Self-hosting/reproducibility:** Explored self-hosting and IaC with Proxmox, Docker/Podman, k3s, Tailscale, pfSense/OPNsense, Nginx/Caddy/Traefik, Authentik/Authelia, and Ansible; adopted NixOS as my daily driver.

**Avanteam**, .NET Developer — Toulouse, France
Feb 2020 – Jan 2024
4 years

- **Internship:** Joined as an intern and was hired full-time after delivering a task-scheduling module integrated into the Avanteam product.
- **Project Management:** Led customer projects end-to-end, from specification and architecture through delivery and production run.
- **Product Development:** Maintained and evolved the internal development module, then drove the most technical customer projects.
- **Mentoring:** Regularly helped colleagues unblock technical issues and shared knowledge across the team.

## Projects

**Task Scheduling Module** — Avanteam
Jan 2020

Product module adding a scheduling interface to plan, assign, and drive quality-record workflows without opening each record.

- Built during internship and evolved since; led to full-time hire
- Built with .NET, JavaScript, and jQuery; rolled out to multiple customers

**AI Assistant for Avanteam Solution** — Avanteam
AI assistant embedded in Avanteam Solution to help users exploit documentation and quality records. — Oct 2025 – present

- Built for Avanteam Solution, a web app builder used mainly for Electronic Document Management (GED) and Quality Improvement Manager (QIM)
- Helps users research, analyze new reclamations, prepare audits, and otherwise exploit documentation and quality records
- Uses agentic RAG with tools to search indexed records and attachments broadly, plus tools to open specific records or attachments
- Indexes data in Azure Search or OVH PostgreSQL
- Installed as a module in the .NET host via the product's Extension mechanism; exposes a React frontend and a proxy API to the external Python/FastAPI SaaS API that implements the AI capabilities with LangChain/LangGraph

**Unstructured Document Extraction** — Avanteam
Multi-agent pipeline that ingests unstructured documents and imports them as typed records with the correct metadata. — Dec 2025 – present

- Classifies unstructured input (PDFs, Word, Excel, emails), runs OCR, and extracts metadata via a LangGraph agent workflow
- Deployed as a customer-side .NET extension integrated with the external AI API

## Education

**École Nationale Supérieure de Cognitique (ENSC)**, Engineering Degree in Computer Science — Bordeaux, France, 2017 – 2020

- **Software Engineering:** Software engineering curriculum with a strong focus on .NET development
- **Engineering Sciences:** Control systems, regulation loops, PID controllers; mathematics, statistics, and signal processing
- **UX & Human Factors:** UX design and human factors coursework
- **Robotics:** Final-year specialization in robotics; introduction to embedded systems and computer vision

**Lycée Louis de Cormontaigne**, Preparatory Classes in Physics and Engineering Sciences — Metz, France, 2015 – 2017

- **Preparation for Entrance Exams:** Intensive preparation for the French "grandes écoles" entrance exams
- **Core Subjects:** Advanced mathematics, physics, and engineering sciences

## Skills

**AI Engineering:** Agentic RAG, AI evaluation, unstructured document extraction; agentic coding, LangChain/LangGraph, skill/tool/MCP/ag-ui design, agent UI, AI integration

**Backend:** Python, FastAPI, .NET/ASP.NET, PostgreSQL; Microsoft SQL Server, REST APIs, job queues, asynchronous processing, Git

**Frontend:** React, Next.js, Chakra UI

**Cloud & Infrastructure:** Azure, Linux, Kubernetes, CI/CD, observability (Prometheus, Loki, Grafana); OVH, Docker/Podman, Rancher, NixOS

**Technical Leadership:** System design/architecture, leading and mentoring small teams, code review, product-engineering collaboration

## Languages

**French:** Native

**English:** Professional working proficiency

**German:** Basic proficiency
